

God gives us the majesty of personal choice, to go His way or our own.

IF GOD HAD WANTED ROBOTS, He could have programmed everybody to love Him. Instead, He made us with a free will and gave us the majesty of choice, so we could *choose* to love Him. This is the age of grace in which we have to make our own decisions to love and serve Him. We have to voluntarily choose God and His way, as revealed to us through His Word.

One of the main reasons we're here in the first place, from the Garden of Eden to the present, is to learn how to make decisions under God's guidance. All of life is that way. We must constantly make decisions and choices. If we know and love and want to please Him and do what's right, this causes us to seek Him in prayer and ask Him for the answers. It makes us dependent on Him as we try to make the right decisions so we'll go the right direction.

He put us here to make decisions. He tells us what's right and wrong, but then He doesn't make us do either; He lets *us* make the decisions. Are you choosing God's way?
